

Bathrooms that feel as good as they look.
A Luminous Heaven, London by Kallums Bathrooms

Bathroom heating

Electric heating designed to perfectly fit the bathroom environment, from floor to towel heating. Making bathrooms feel as good as they look.

Case Study: A Luminous Heaven

ThermoSphere electric towel bars feature exquisitely in a London bathroom suite designed by Kallums Bathrooms. This case study looks at the heating choice and premium finishes, resulting in a space of luxury and relaxation.

Project: A Luminous Heaven, Kallums Bathrooms

Project type: Residential bathroom

Location: London

Designer: Kallums Bathrooms (kallumsbathrooms.co.uk)

Products: Single ended electric towel bars

Project price: £40,000

Kallums Bathrooms describe a calm place for the morning routine and the evening wind down. Their own account is at kallumsbathrooms.co.uk/a-luminous-heaven.

About ThermoSphere

A British-based manufacturer of electric heating, trusted by designers and installers across the UK since 1998. We design reliable, high-performance electric heating products that are easy to specify, quick to install and built to last.

thermoSphere

It needed to add warmth
at the moment of leaving
the shower or bath without
competing with the
materials around it.

What did the product need to do?

Large format marble effect wall tiles, textured floor tiles and a deep wood vanity leave little room for clutter. The brief was a heated towel product that sits quietly against these materials rather than competing with them. Not only is it silently heating, but also embracing the warmth and natural tones to complete the calm comfort of the design.

Why choose towel bars in a designed bathroom?

They keep towels warm and dry, ready for the moment you step out. Being electric, they need no pipework or link to the central heating, so position can follow the design and the floor stays clear.

Questions often asked

Can I order a custom colour?

Yes, custom colours are available on request with a bespoke finishing service. Lead times vary depending upon the finish, so check before committing a colour to a design.

How do I specify electric heating?

The online specification tool builds one brief covering underfloor heating, towel bars, mirror demisters and thermostats. Capturing all elements of bathroom heating and control, ready to schedule.

Why electric heating?

Electric heating not only heats quickly, ideal for rooms that are not used all day, it is also easy to add to awkward layouts and retrofit projects. Not to mention subtle installation and underfloor heating being a low profile, adding only millimetres to the floor height.
